

# Internal Grant Agency of the Prague University of Economics and Business

## Suggestions regarding the elaboration and evaluation of final reports of IGA/A GC projects

### **A. Achieving project objectives**

- a) Have the project objectives been achieved?
- b) Is the implementation of the project sufficiently scientifically justifiable (especially the correct use of methods)?
- c) Does the implementation of the project show elements of innovation?
- d) Has there been progress in the state of knowledge and contribution to the development of theory in the relevant field?

### **B. Publication activity**

- a) Have the obligations been fulfilled as regards the submission of publication outputs for peer-review or to publishing houses?
- b) Are there already published project outputs?
- c) Is it realistic to achieve publication outputs at least at the same or higher quality level than originally anticipated in the grant application?
- d) Have the project outputs already been published or submitted for peer-review in the number corresponding to the originally anticipated number in the grant application?

### **C. Usability of the research results**

- a) Are the project results socially relevant, usable in practice?
- b) Can further research at VSE suitably built on the project results, in particular externally funded research?

### **D. Management with allocated funds**

- a) Has the budget structure been respected or, if there have been any transfers of appropriations in budget, are these transfers duly justified?
